

USGBC TEXAS GULF COAST REGION

Starting November 1st, LEED v4 came into effect. To help the building industry get familiar with this new Rating System, USGBC Texas Gulf Coast Region is conducting regional presentations given by subject-matter experts from Gulf Coast region. Topics include Materials, Integrative Process, Energy Modeling, Envelope Commissioning, Daylighting & Views, Water Analysis, LCA & Site Design.

LEED V4 SERIES

Admission: Free

Meeting starts 11:30 am

Lunch Sponsor: **SOLARNET**

FEBRUARY 20th Kirksey Architecture
6909 Portwest Drive, Houston, 77024.

What are the cost benefits of Systems Commissioning ? Does LEED Commissioning have anything in common with Commissioning required by Energy Code ? How can Advanced Metering be integrated with Building Automation System ? Does Centerpoint Standard Offer Program facilitate implementation of LEED Demand Reduction Credit ? To answer some of these questions and more, please join Damian Briseno and David Murrah.

Damian Briseno is a commissioning agent with **Wylie Associates**. With 18 years' experience in the HVAC controls industry, Damian brings in-depth knowledge for the latest control platforms. He utilizes this background in developing and producing safe and efficient functional test procedures. In addition, Damian is involved in the diagnostics of existing HVAC systems, the associated controls and detailed cost estimation of control retrofit projects to support retro-commissioning projects.

David Murrah is a Solutions Design Engineer with **Automated Logic**, a company that manufactures, installs and services building automation systems (BAS). David works with Automated Logic's customers to find inventive ways to improve comfort and save energy by leveraging the capability of their BAS. He has also been working with the USGBC's LEED programs since 2007, and has seen LEED grow and change in order to improve the way buildings are designed and built as well as how they impact our world.

USGBC membership renewal available at this event. See link for available opportunities: <http://www.usgbctexas.wildapricot.org/>

COMMISSIONING, METERING & DEMAND REDUCTION
